FULL STACK WEB DEVELOPER

EDUCATION

Rutgers, the State University of New Jersey, New Brunswick, NJ　　　July 2017 - 2018
Full Stack Web Development Program
- Dedicated to designing and building web applications, RCB is a 24-week long intense boot camp to transform their students into Full-Stack Web Developers.

Rutgers, the State University of New Jersey, Newark, NJ　　　2020

TECHNICAL SKILLS

Front-End
- HTML5 & CSS3

Back-End
- Javascript, JQuery, Firebase, Node.js, Express, MySQL, HandlebarsJS, MongoDB & ReactJS

Frameworks
- Bootstrap-3, Bootstrap-4, MaterializeCSS

Applications Built

Etan Bot
- A bot created for the popular communication application, Discord. The bot is a quality of life improvement to the already existing Discord server functions, like greetings to new members or timed kicks with custom messages. Also has additional commands such as posting gifs or news from your favorite sites.
- Back-End Development
- https://github.com/NES-Elliott/Etan-Bot

Mash
- A web application created with HTML, CSS, and JS. I worked with an API from a gaming database called 'IGDB'. The goal of the project was to gather any information about a game that a user was interested in and display it in one place. This application does not feature a database, so all of the information is manipulated on the fly and displayed to the user.
- Full-Stack Development
- https://github.com/NES-Elliott/Mash

Experiences

MENTORING
- **Ambassador for Rutgers' Future Scholar**

INTERNSHIPS
- **Ernst & Young**
- **Bravo**
- **Wells Fargo**

COMMUNITY SERVICE

- **Rutgers Against Hungry, New Brunswick, NJ**
- **The Relief Bus/New York City Relief, Elizabeth, NJ**
